Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in June, 2005 and no WBCR was observed. Due to poor public access, only one site was evaluated. The site is approximately 0.3 miles upstream from the mouth of the stream and was dry. Because the stream was dry at a location close to the mouth, the committee recommends removing the WBCR designation.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
